

Pistol Whip

Inspired by God-mode action movies like John Wick and Equilibrium, Pistol Whip puts you gun-first through an explosive batch of hand-crafted action scenes each set to their own pulse-pounding soundtrack. But unlike traditional music games, Pistol Whip has no line in the sand; you have complete freedom to shoot, melee, and dodge targets to the rhythm YOU see fit. • Pair the pulse-pounding pace of an FPS with the flow-state energy of a music game in a cinematic symphony of violence. • Form your rhythm and find your playstyle, from tactical to musical, then challenge your skill with friends and world leaderboards. • Infiltrate a fever dream of hand-crafted scenes, from bank heists to android uprisings, each uniquely designed to music. • Featuring EDM artists from Kannibalen Records, including Apashe, HVDES, and Black Tiger Sex Machine; with more to come... • Pistol Whip is cross-buy enabled for Rift and Quest.
